

XF – Laboratory Introduction

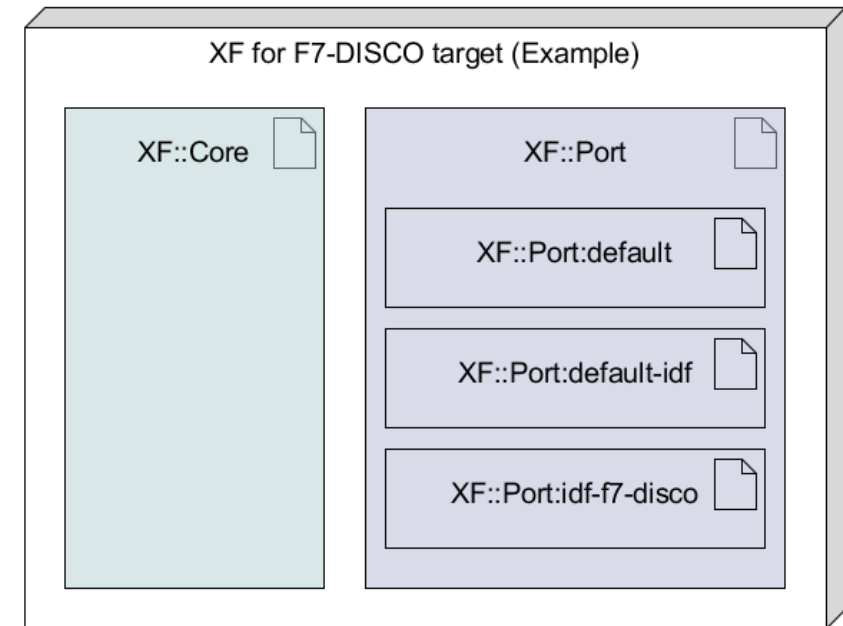

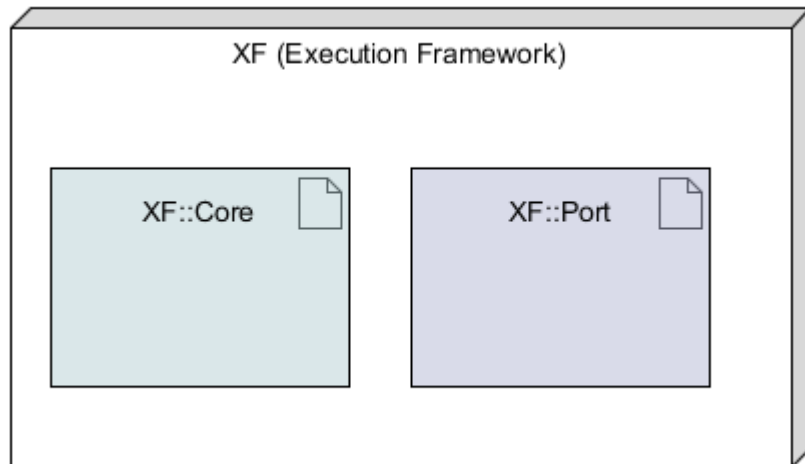

Medard Rieder
Thomas Sterren

XF – Class Diagram – Simplified

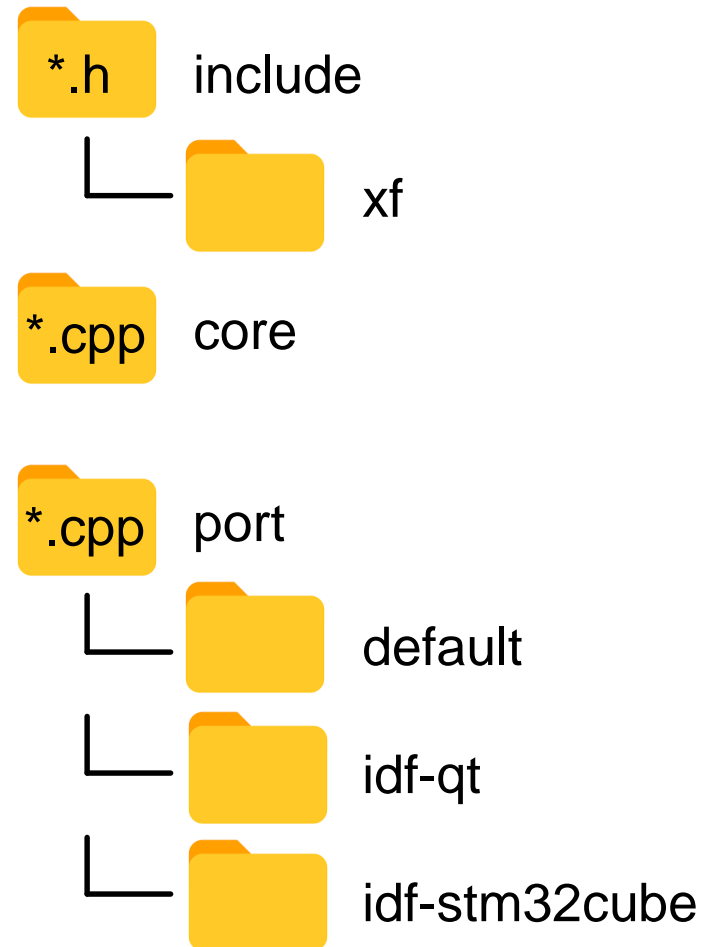

XF – Core and Port

To build an XF the Core component and a Port component is needed

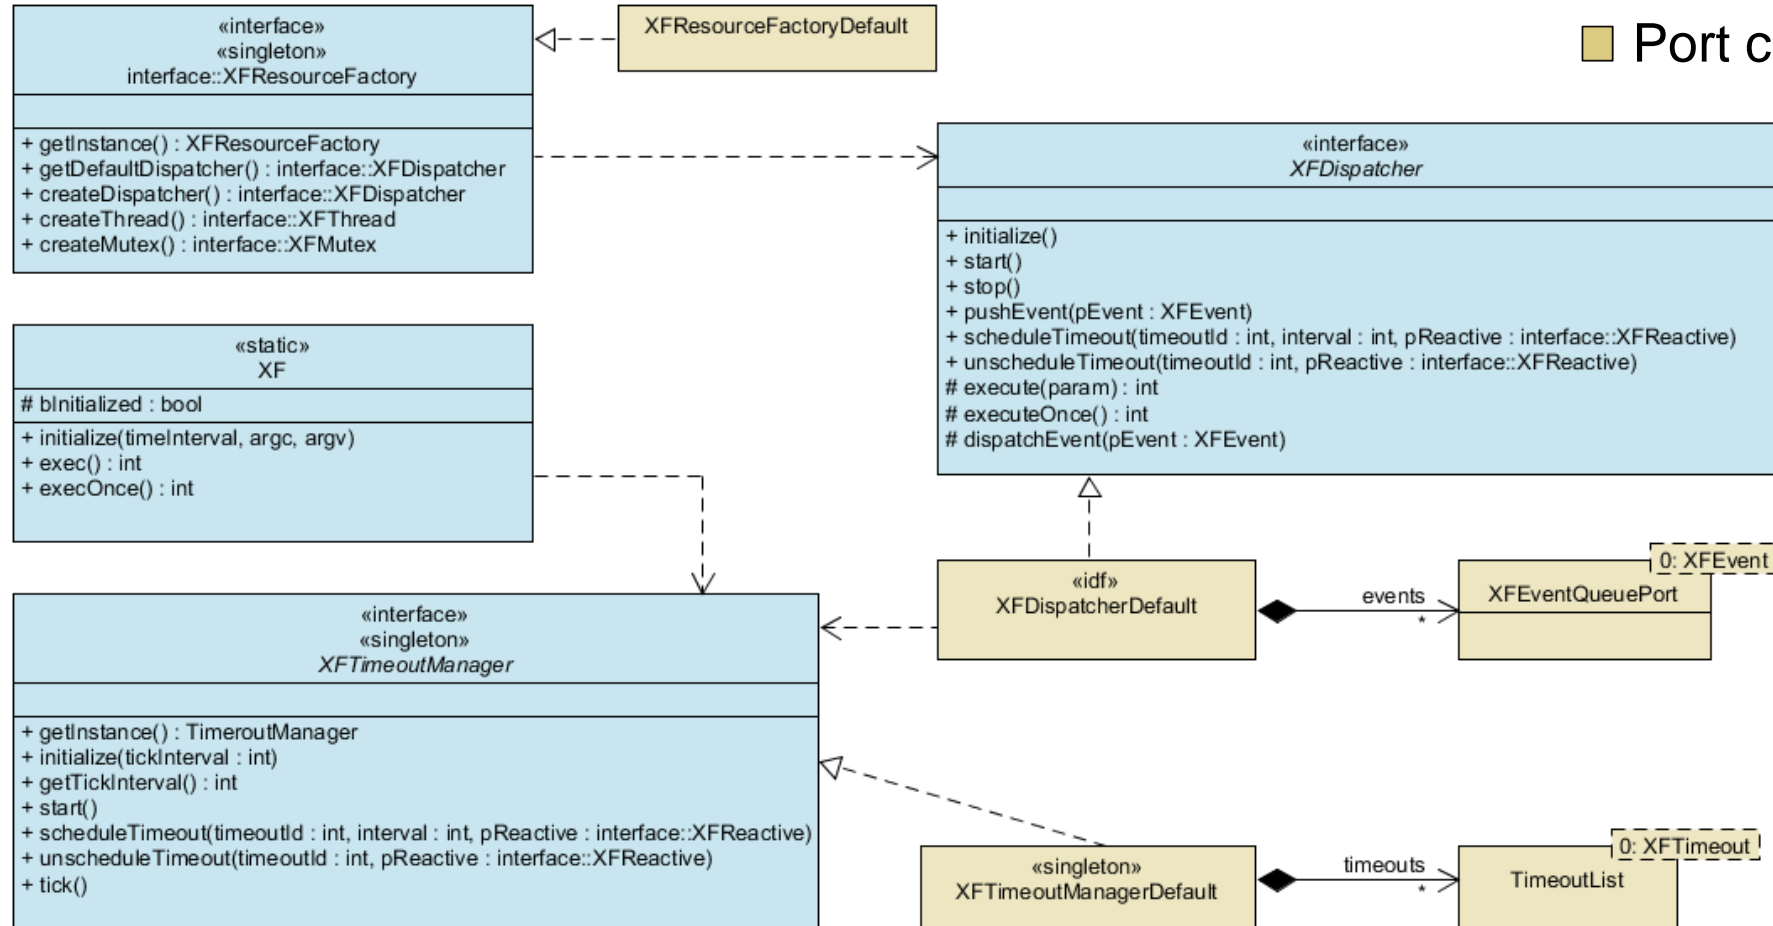

Example: IDF on an F7-DISCO board

XF – Folder Structure

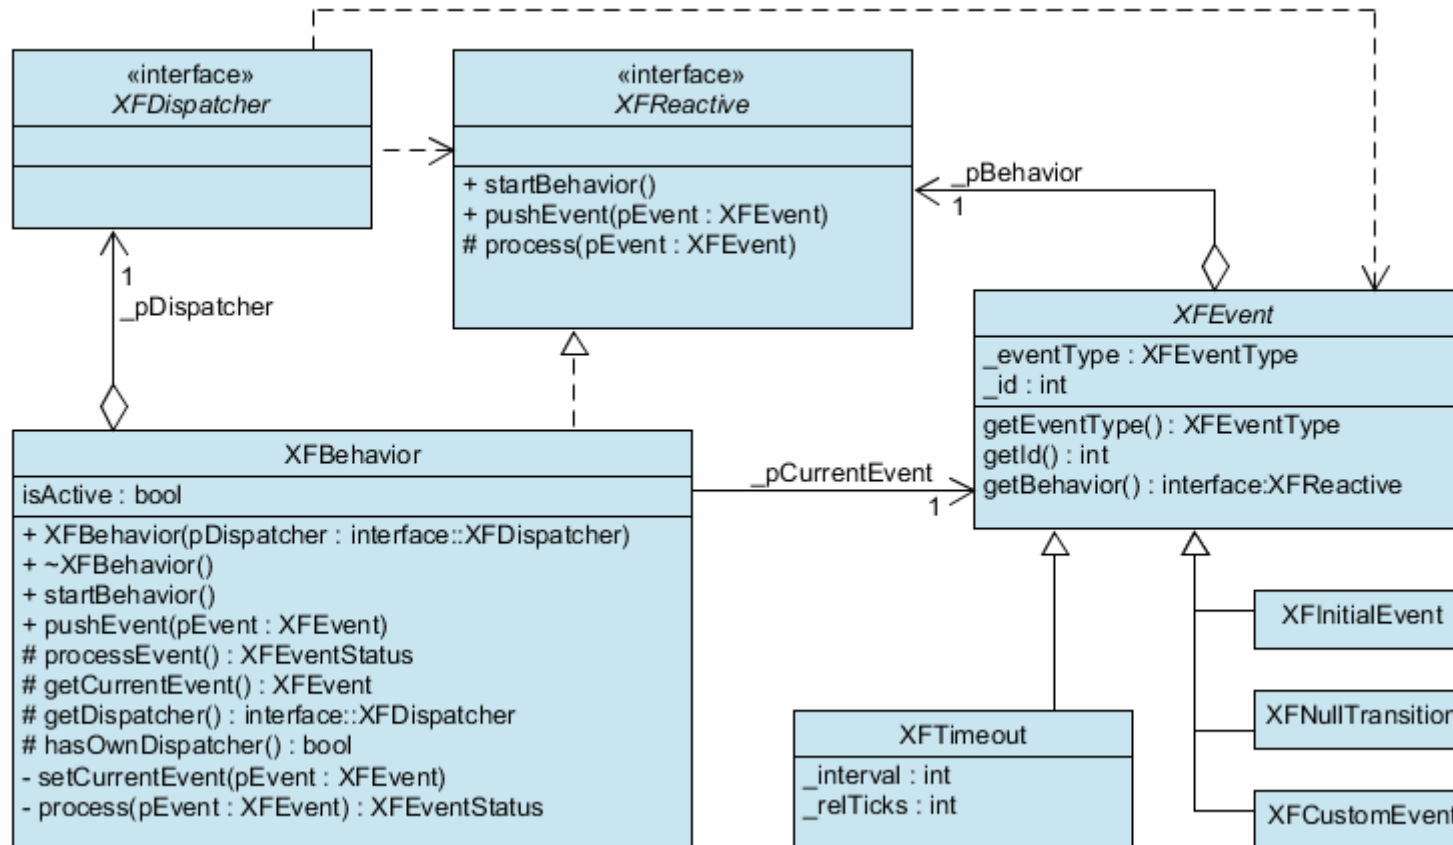

XF – Class Diagram – Detail 01

Core classes
Port classes

XF – Class Diagram – Detail 02

- Core classes
- Port classes

XF – Where to Start

The XF is a framework

The XF does not have `main()` function

Start with the following Qt Creator project

test-bench/test1/ide-qtcreator-test1-idf/test1-idf.pro

Study the XF and test-bench documentation

Implement the default port classes

Try to build and run *test01*
